PROFESSIONAL SUMMARY

MCA post graduate and a thorough, tenacious **Workday FSCM Functional Consultant** with **3.3 years** of experience implementing and supporting Workday Financials: General Ledger (GL), Accounts Payable (AP), Accounts Receivable (AR), Fixed Assets, Procurement and Expenses. Deep understanding of client business requirements, with a flair for results and problem solving. Skilled in functional design, unit testing and user acceptance testing, and in post-production support with root cause analysis within SLA. Excellent client interaction skills; works well independently and in a team.

TECHNICAL SKILLS

- **Workday Financials:** General Ledger, Accounts Payable, Accounts Receivable, Fixed Assets, Procurement, Expenses
- **Configuration:** Business Process Framework, Account Posting Rule Sets, Worktags & Financial Dimensions, Organization Hierarchies, Allocation Definitions, Intercompany, Custom Validations, Bank Setup & Settlement Runs
- **Security:** Role Creation, Security Groups, User-Based Groups, Domain Security Policies
- **Data & Integration:** EIB (Inbound & Outbound), Financial Data Migration, XSLT
- **Reporting:** Custom Reports, Scheduled Reports, Financial Reporting & Dashboards
- **Accounting Concepts:** Journal Entries, Accruals, Adjustments, Revenue Recognition
- **Delivery:** Functional Design, Unit Testing, UAT, Production Support, Root Cause Analysis
- **ERP Applications:** Workday Financials

CORE EXPERTISE

- Strong understanding of Workday architecture and tenant setup.
- End-to-end financial business process configuration: Accounting Journal, Supplier Invoice, Customer Invoice, Requisition and Purchase Order, with approval workflows and condition rules.
- Ledger and accounting setup: ledger accounts, account posting rule sets, journal sources and ledger configuration.
- Worktag configuration and financial dimension mapping: spend categories, revenue categories, cost centers, projects and custom worktags.
- Organizational hierarchy setup: company, cost center, location and project.
- Asset management: depreciation profiles, asset transfers, disposal and impairment.
- Financial data migration using EIB: journals, supplier invoices, customer invoices and assets.
- Allocation definitions, intercompany processing and financial reporting structures.

PROFESSIONAL EXPERIENCE

Workday Consultant | Swift Solution Private Limited

June 2023 – Present

Project: Workday Development and Support | **Client:** Unity 3D | **Role:** Workday Finance Consultant | **Team Size:** 5

General Ledger & Accounting Setup

- Implemented and supported Workday Financial modules (GL, AP, AR, FA).
- Created Companies, Ledgers, Calendars and Ledger Accounts.
- Defined Account Posting Rule Sets for various transactions.
- Created custom validations and allocation definitions; set up intercompany processing.

Procure-to-Pay & Expenses

- Configured business processes for Accounting Journal, Supplier Invoice, Requisition and Purchase Order.
- Set up Bank Accounts and Routing Rule Sets, payment types and settlement runs.

- Created Sales Items, Expense Items and Purchase Items; set up Customer and Supplier categories.
- Implemented Supplier External Site and portal enhancements.

Fixed Assets

- Managed Asset Books, Depreciation Profiles, Asset Transfers and Disposal.

Worktags, Organizations & Security

- Configured Worktags: Spend Categories, Revenue Categories, Cost Centers and Projects.
- Created Cost Center, Project and Location hierarchies.
- Configured financial business processes and approval workflows.
- Created and assigned security roles and user-based groups.

Data Migration, Reporting & Support

- Created EIBs for bulk data uploads: Journal, Supplier Invoice, Customer Invoice, Asset Register and Dispose Asset.
- Developed custom reports and scheduled them as per business requirements.
- Provided post-production support and resolved financial issues as per SLA.
